Passage of The Seven Rays From Source to Earth

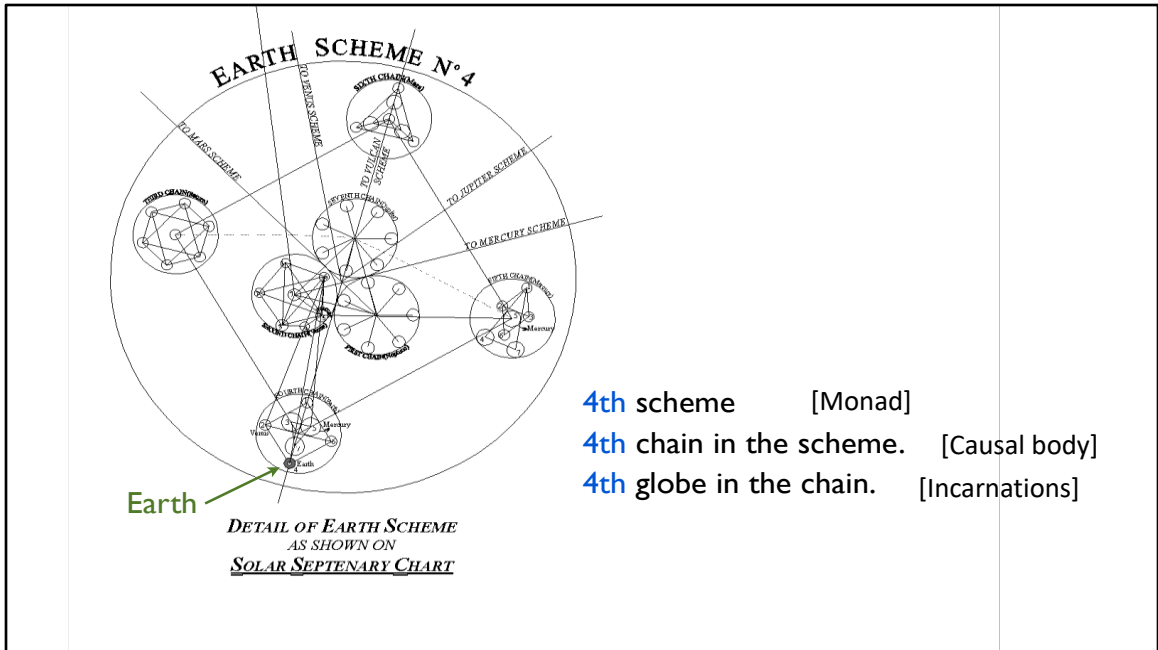

## Chains, Schemes, Globes

- A **scheme**, in its totality, corresponds to the **Monad**, or to the monadic auric egg, in connection with a human being and his forty-nine cycles.
- A **chain**, in its totality corresponds to the **body egoic** of a human being, to the **causal body** [soul] with its seven great [Page 383] cycles.
- A **globe**, with its seven races corresponds to a particular series of **incarnations** in connection with a man, incarnate or discarnate, for all globes are not on physical levels.
- A **physical globe**, in a chain corresponds to a particular physical incarnation of a man. The planetary Logos takes physical form in His planet and is its life and works out His purposes.

TCF p382-3

A scheme contains 7 chains.

Each chain then contains 7 globes.

In the Earth scheme, Earth chain, the physical planet is the 4<sup>th</sup> globe.

What are the chains and the globes? Globes deal with the incarnations – the amount of matter within each globe. As our globe manifested, it densified until we know our globe our Earth.

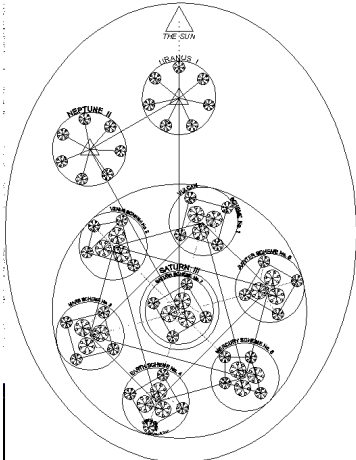

As it will become more obscure and reach higher levels of being it will again become more ephemeral and less dense. – 4<sup>th</sup> letter of the alphabet “D” – density

DK gave us the 4 D’s to work on - **Discrimination, Dispassion, Discipline, Decentralization + detachment**, given to Disciples to work on so they can become less dense.

4 is associate with 4<sup>th</sup> R Harmony thru conflict, hence earth Logos is undergoing its 4<sup>th</sup> initiation and as we evolve, s/he evolves. 4<sup>th</sup> R is about suffering. It rules the human kingdom.

- Uranus – scheme 1
- Neptune – scheme 2
- Saturn – scheme 3
  - Note that Saturn has double rings

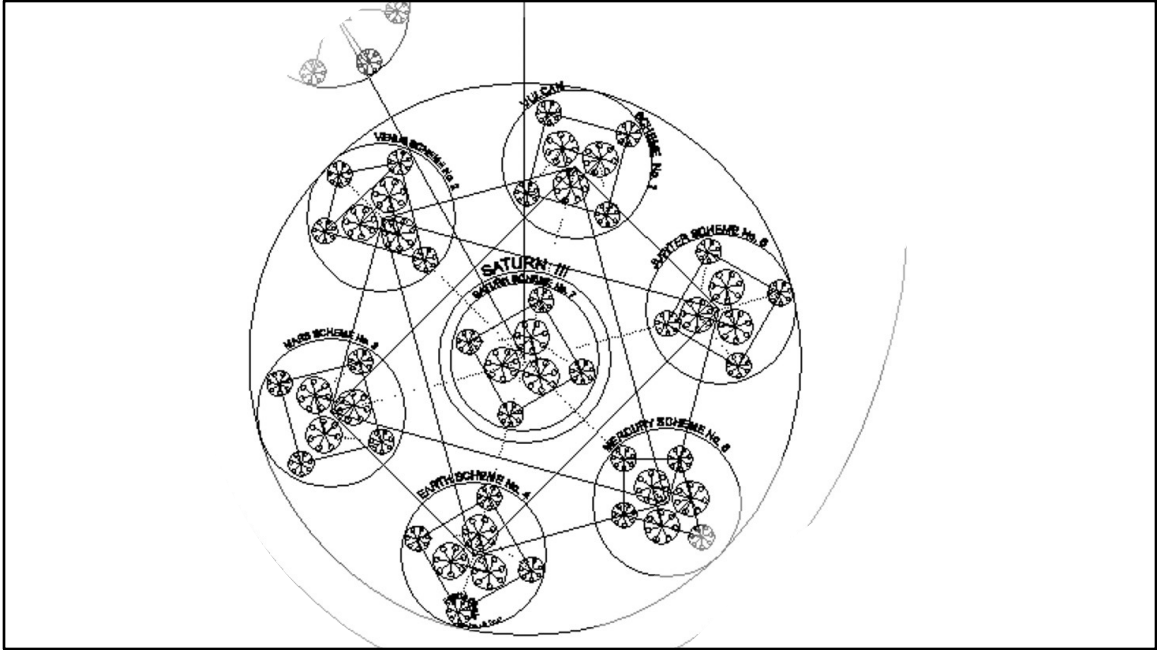

The planets which are the expression of the three major rays are:

Ray I..... Uranus.

Ray II..... Neptune.

Ray III..... Saturn.

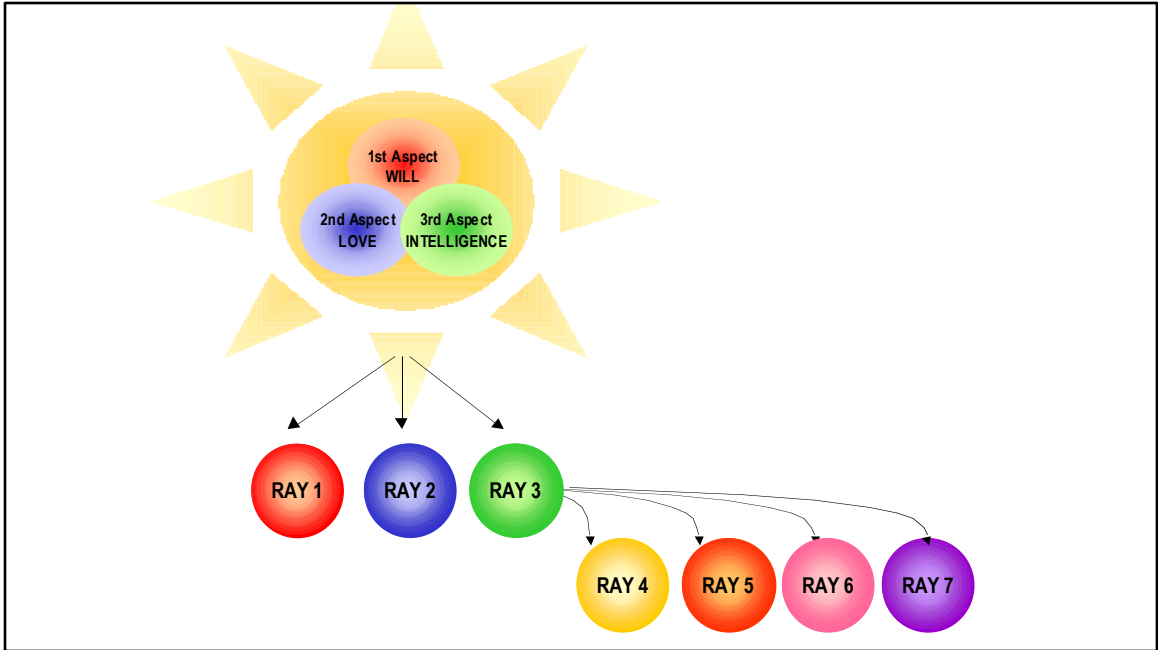

## Some Quotes about the 3 Synthesizing Planets

- Ten planets (seven sacred and three non-sacred) eventually merge into the three, and finally the three are blended into the one.
  - This can be traced along the line of analogy as we consider the seven Rays.
  - These seven Rays, which in manifestation are diverse, are eventually synthesised. The minor four are blended, into the third major ray, and the three major rays are finally merged into the one synthetic ray - the Love-Wisdom Ray.
  - We have, therefore, the three crowning rays [Rays of Aspect], but seven seen during the evolutionary process. ...there are, therefore, three planets which might be considered as synthesising planets, and four which are blended eventually, until the three have absorbed the essence of the four; finally the one absorbs the essence of the three, and the work is completed.
  - This process lies many millennia ahead, during the inevitable period of the gradual obscuration of our system. TCF 236 [See next slide](#)
- Uranus, Neptune and Saturn, are the synthesizing planetary schemes, and provide conditions suitable only for the very advanced stages. They are the "reaping" planets.  
(TCF 775-777)

Father, Son, Holy Ghost/Mother  
Spirit, Consciousness/Soul, Appearance  
Shiva, Vishnu, Brahma

- The Moon chain with the Earth chain formed two units, or two polarities, negative and positive. The point of merging was reached, and the Earth chain absorbed or synthesised the moon chain in the same sense as certain of the schemes will merge until only three will apparently be left. [the 3 Rays of Aspect - the 3 synthesizing planets] (TCF 414)
- The three major planetary schemes (Uranus, Neptune, and Saturn) have not, as yet, received their fullest stimulation, and will not do so until the 'energy of the sacred seven' has been transferred to Them. (TCF 793)
- As we know, the planetary schemes (the seven sacred planets) will eventually synthesise, or absorb the life of the planets which are not termed sacred ... (TCF 1173)
- The four schemes which form the logoic Quaternary will merge into their synthesising scheme, that of Saturn, while Venus and Mercury will merge into Uranus and Neptune. (TCF 406)

WE are told that Moon Chain humanity, those that transferred to the Earth chain were quite more advanced intellectually.

The lower quaternary – which schemes are included is still up for consideration and speculation.

Again, as a planetary scheme nears its consummation, it becomes "radioactive," and through radiation transfers its essence to another "absorbent planet," or planets, as is the case with a solar system also. (TCF 1062)

**These three major schemes are the absorbers and synthesisers of the energy of the others.** (IHS 96)

**The three great planetary schemes, Neptune, Uranus, and Saturn,** will be the recipients of those who are esoterically "saved" from among the other schemes. That is to say that all those who, in any scheme, achieve the needed expansions of consciousness (such as will be achieved by the majority of the human family prior to the middle of the next great cycle, or round), will be considered "saved," whilst the remainder will be held to be failures, and will be held over for further development during later periods, or will be transferred to those planetary schemes which from the point of view of time are not so far advanced as our Earth scheme.

Those that make the grade will move on. Those that don't, that are not sufficiently evolved will be transferred to Mars.

## Uranus

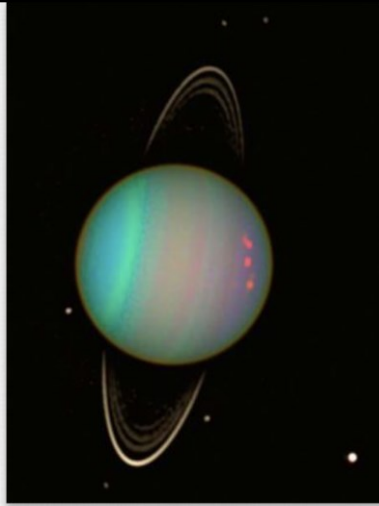

**Personality Ray: R3** (speculative for the following reasons)

- “Two of our planets, the Earth (non-sacred) and Uranus (sacred), are directly the product of this third ray activity.” (EA 200)
- “Water being the symbol of substance and of material expression plus emotional motivation, Aquarius is consequently dual in its activity, and the third ray expresses itself powerfully through this sign, reaching our planet through Uranus and the Moon which hides or veils Uranus symbolically in this case. There is, therefore, to be found the double influence of Uranus, expressing the quality and bringing in the energies of the seventh ray, in one case, and the third ray in the other.” (EA 138)

**Soul Ray: R7** [given by DK]

**Monadic Ray: R1** (cf. EP I 420) Uranus is “home of fire electric” (TCF 1154). Home is monad. “I [the Monad] leave the Father’s home, and turning back, I save.” (MDR)

R7 – colour purple, manifestation,  
These Monadic rays are deduced from MDR

In keeping with its non-conformist and revolutionary reputation, Uranus has a unique configuration because its axis of rotation is tilted sideways, nearly into the plane of its solar orbit.

# Neptune

**Personality Ray: R4** [speculative']

(it is closely related to Buddhi on the fourth plane) or R3 (as it is closely related to the "waters of space" and to the third aspect as its trident symbolizes).

**Soul Ray: R6** [given by DK]

**Monadic Ray: R2** (cf. again, EP I 420)

R6 – higher ideals, faith – rules the higher solar plexus  
R2 – universal love – expanding as large as the oceans

# Saturn

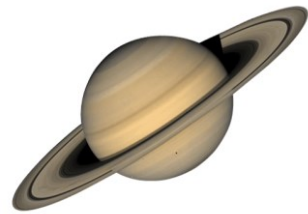

**Personality Ray: R1** [speculative]

There is relation to the higher vehicles of Saturn, as He is so much connected with the first ray Lords of Karma.

R1 in relation to Saturn, and of the connection through the Great Bear/Leo/Saturn Triangle.

**Soul Ray: R3** [given by DK]

**Monadic Ray: R3** (cf. EP I 420)

Monadic Rays of the Synthesising  
Planets:

Uranus -	Monadic Ray:	R1
Neptune -	Monadic Ray:	R2
Saturn -	Monadic Ray:	R3

The planets which are the  
expression of the three major rays:

Ray I..... Uranus.  
Ray II..... Neptune.  
Ray III..... Saturn.

If the assigning of the Monadic Rays are correct, because they are not specifically mentioned, just hinted at, then they line up with the 3 major rays of Aspect. The Plan is quite intricate, but everything fits like a very intrinsic puzzle. We just don't know where all the pieces go.
