Uranus

Uranus

- exoteric ruler of **Aquarius**;
- esoteric ruler of **Libra**
- hierarchical ruler of **Aries**.

This triple inflow of **seventh ray** energy ... is potent to effect major changes in our little planet (Earth). It is interesting to realise that **Aries**, the Inaugurator, is rendered effective on the Earth through the organising potency of **Uranus**. **Aries** is the source, the beginning and the initiator of the New Age... **Aquarius** is the present Determiner of the future. That which is now initiated in **Aries** will become manifested in **Aquarius**, and **Libra** will enforce the achievement of a point of balance. (EA p548)

Uranus – 7th R

exoteric ruler of **Aquarius**;

esoteric ruler of **Libra** and

hierarchical ruler of **Aries**. They are linked.

The circulating of its energies can be portrayed by the following symbol or diagram:

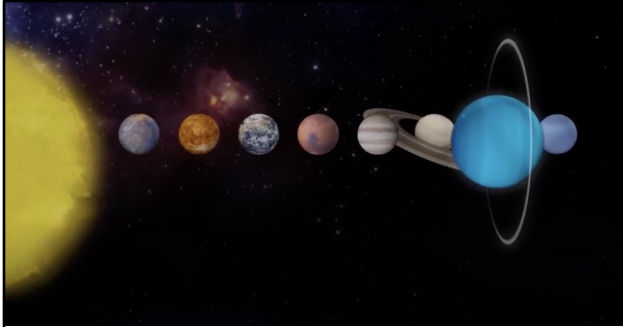

[Uranus](#) is one of the “modern” planets, together with [Neptune](#) and [Pluto](#). This expression refers to planets that were unknown in antiquity, at a time when it was not possible to glimpse them with the naked eye.

Uranus was discovered in 1781 by British astronomer William Herschel (1738-1822). Its name was suggested by the the German Johann Bode, based on the name of the father of Saturn and grandfather of Jupiter.

Ancient astrology was incomplete until man became responsive to the influences which come to him from **Uranus** or Pluto, which affect the soul life far more than they do the personality life.

Uranus is the seventh [planet](#) from the [Sun](#).

The orbit is quite different from other planets in the solar system. An **eccentric path**, rotates on its own axis at a right angle, giving the impression of having the poles where the other planets have the equator.

[Uranus](#) travels in the **opposite direction** (from east to west) to most other planets in the solar system (a feature it shares with [Venus](#)). These bizarre characteristics have led Astrology to associate this planet with everything that is **marginal, misadapted, and genius**.

Uranus takes 84 years to completely circle the [Sun](#) and about 7 years to move through a single sign. Therefore, his influence is felt for long periods of time. All people born within the same 7-year period have the same sign on this planet, **influencing the behavior of an entire generation**.

- Both Venus and Uranus travel in opposite directions
- are rulers of Libra and in Libra the reversal of the wheel takes place.

Esoteric Facts About Uranus

Uranus and Ray One

- **Uranus** is the home of 'fire electric'." (TCF 1154; EA 672)
- **Uranus conveys the First Ray:** "Will or Power Representing the Sun ... Flame." (EP I 163)
- **Uranus Rules the Head Center of Advanced Disciples:**
"The throat centre is ruled by Saturn just as the two head centres are ruled respectively by **Uranus** (ruling the head centre) and Mercury (ruling the ajna centre). This is only where the disciple is concerned. For average man it rules the sacral centre. (EH 151)
- **Uranus—Conduit for the Central Spiritual Sun:**
"... the central, spiritual Sun pours its influences through **Uranus**. The activity of **Uranus** is only registered at a very advanced stage of development upon the Path and ...by an act of the will, the conscious and illumined man (focussed in the highest head centre) arouses the centre at the base of the spine and draws the kundalini fire upwards." (EA 296)

7th R is about manifestation and ruling the sacral centre is where we manifest and produce babies.

Futuristic Floating City

- planet of change, experienced through revolution, renovation, reformation, and redesigning something to fit a new paradigm or concept.
 - “out of the blue;” most often we did not see it coming or request the change – unpredictable
 - a lightning bolt, filled with kinetic, electrical energy that must be grounded in order to be dispersed
 - it re-patterns that which it touches; brings change to economic, political, or sociological systems.
 - Uranus is a radical. It spins on an axis perpendicular to the sun.
- Behaviour - lead to eccentric behaviour or change for change's sake, irrational or erratic, as well as absolute brilliance and genius.

- **Uranus** – known as the father of electricity. Comes in like lightening.
- **Uranus**, initiates a new order and conditions in the life of the disciple—understanding of the causes of things as they are, desire to change the old order, the old orientation into the new, the urge to better conditions.
- Uranus’ influences has led to the rise of rebellions, revolutions and liberations.
- Influence on personalities is unpredictable or erratic, nonconforming.
- This produces the reversal of the wheel - Libra.
- In one's natal chart, Uranus dictates what makes a person eccentric, strange, unique, wild / untamed, adventurous, sociable, and outgoing.
- Uranus is an intuitive and illogical planet, so one can jump to conclusions.

1st of the three “transpersonal” planets, at the outer reaches of the solar system, unable to be seen with the naked eye, and pertains to that which is subtle, not personal, and tends toward the universal.

- Uranus brings the will to be distinct, unique, alternative, and to express one’s will in a way that leaves a mark on the world, makes an impression, and changes one’s environment.

- **Uranus'** job is to break rules and demolish established patterns or structures, creating sudden radical-change.
- People influenced by **Uranus** are **visionaries** and **fearless**; not afraid to rise up against what is established and to **question** the traditionally accepted currents.
- No need to be socially accepted yet has a deep **social conscience** and acts with the **common good**; for the good of all and not so much for the individual good.
- The Uranian personality fights for **social justice** and fights for the oppressed.
- Uranus asks us to adopt a humanitarian spirit and global mindset, allowing us to live as one unified being.
- While most times it can make those under its influence outgoing, it could also make others quite remote. Some will have difficulties developing intimacy on a personal level. May become moody, bitter, and hypersensitive. This is the unfavorable aspect of the planet.

• **Because Uranus is intuitive, insightful, and when in good aspect to a planet of the mind (Mercury, Venus) brings quickness, understanding, and correct analysis to the person.**

• **It also can bring a depth of understanding and direct cognition of the matter at hand.**

• **In Libra, an air sign, Uranus can make for a very keen mind, an intuitive mind and one that can come up with different ideas.**

When Uranus is in aspect to a planet of emotions (Moon, Mars, Venus) our passions are very excitable, quixotic, and quickly subject to change. The native will tend to wear their heart on their sleeve.

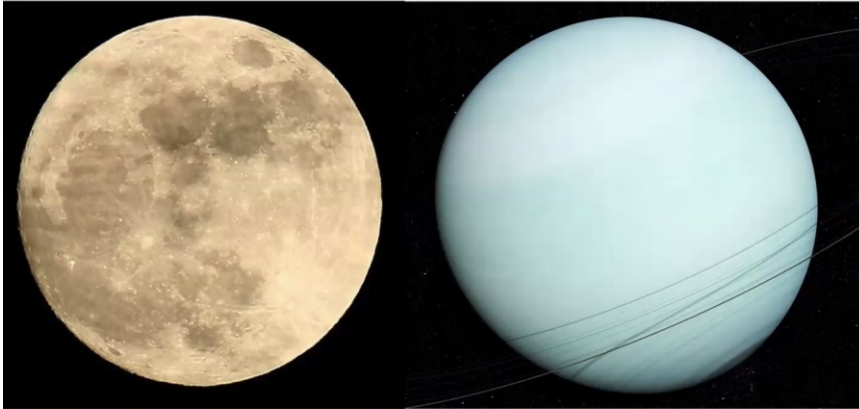

Uranus - Veiled by Sun and Moon

Veiled by the Moon

Taurus (exalted), Virgo (eso), Aquarius (hier) (*Cancer-exo*)

- The moon is a dead form; it has no emanation at all. That is why the moon is spoken of as "veiling", "hiding" or as a blind for Vulcan, Neptune or **Uranus**.'
- Here the intuition of the astrologer and of the esoteric student must be called out.
- "The Moon is frequently used when **Uranus** is meant. Today the Moon is a dead world and the reason is that the **Uranian** urge became so strong in that far distant time when there were living forms upon the Moon that it led to the complete and final evacuation of the Moon and the transfer of its life to our planet. Such a transfer is not necessary today as the consciousness of humanity is such that the needed changes can be brought about without such a drastic procedure. (EA 446)
- The moon chain is in process of disappearance, and only a decaying body is left; the life of the second and the first Logos [1st, 2nd aspects] has been withdrawn from it, and only the latent life of matter itself remains. (TCF 415)

Aquarius

Moon: Hierarchical Ruler

Uranus: Exoteric Ruler

From DK: “When the ruler of a sign is given as the Sun or the Moon, I shall speak of one of the hidden planets, **Uranus** or Vulcan.

These are interchangeable in their use and it is difficult to tell, to which the esoteric planet refers unless you have been told.

In effect, one can see a double dose of the 7th ray in Aquarius.
Maybe that’s why so many people think that Aquarius conveys the 7th R.

- The *Moon* brings about the inclination to create these conditions which lead to the transformations of **instinct** into **intellect**. This the moon brings about, but **Uranus** causes the great transference in the human consciousness from **intellectual perception** to **intuitive knowledge**.

Uranus Veiled by the Sun - Leo

- ... Sun in Leo (physical Sun) is motivated by the energies pouring from "the heart of the Sun" (Neptune) and brings about at-one-ment through the forces which are reaching him (via **Uranus** – Central Spiritual Sun). (EA p 308)
- When Uranus controls, the Leo person is significantly the true observer, detached from the material side of life, but utilising it as he pleases.

We tend to not substitute Uranus/Vulcan when the sun or moon is an exoteric ruler. We do this when it is the esoteric or hierarchical rulers.
